

SirsiDynix®

SirsiDynix's SaaS Offering Earns ISO 27001 Certification

SirsiDynix SaaS security now verified to meet two major security standards.

LEHI, UT (June 10, 2015)—In March 2015, SirsiDynix's SaaS solution was officially certified for compliance with the ISO 27001 security standard. SirsiDynix is now one of the only vendors in the industry to become certified to this rigorous standard.

Published by the International Organization for Standardization (ISO), the ISO 27001 standard is used by many governments worldwide to indicate that security is properly implemented throughout an organization. Compliance with ISO 27001 ensures that senior management is aware of security and involved with assessing risks, and that the organization continuously improves its information security management system (ISMS).

In addition to this certification, SirsiDynix is the only company in the industry to earn an NIST SP 800-53 accreditation for its SaaS offering. This standard examines a system's security on a granular level, covering such areas as corporate operations, technology, physical security, and incident response plans.

Benjamin Card, Chief Security Officer for SirsiDynix, said, "SirsiDynix is proud to be one of the only vendors in the industry to be ISO 27001 certified. With this certification and our NIST SP 800-53 accreditation, our customers can know that all the security measures of our SaaS offering, from detailed processes to broader risk assessments, have been verified by important third parties."

In addition to advanced security, subscribers to SirsiDynix SaaS also receive 99.95% uptime and automatic backups and upgrades.

CEO of SirsiDynix, Bill Davison, added, "With SirsiDynix SaaS, we want to give our customers a robust and secure alternative to local hosting. This ISO certification illustrates the lengths to which we're going to keep library data safe."

About SirsiDynix

SirsiDynix connects people with knowledge at more than 23,000 libraries around the world. Through library management technology and search and discovery tools, libraries using SirsiDynix technology bring relevant resources and the power of knowledge to their users and communities. SirsiDynix technology center is

architected to be open, scalable, and robust, offering a complete out-of-the-box solution and unparalleled flexibility through APIs and web services. Complemented by the most experienced training, consulting, and support staff in the industry, SirsiDynix helps libraries create tomorrow's libraries, today.
