

# *eResource Central*

eResource Central (eRC) unites all your library's digital content in one place: your online catalog. By integrating with more content providers than any other digital content management tool, eRC brings eBooks, audiobooks, and more, straight to the discovery interface your users trust, from the vendors you know best.

## *Easy administration*

From eRC's admin tool, staff can easily view eResource downloads, vendor accounts, and vendor collections all in one place.

## *More visible resources*

eRC interfiles your digital results alongside physical materials in your online catalog, so your users can find your eResources after just a basic search.

*"Frisco has seen eBook use increase 70% in the (almost) two years since we went live with eRC."*

Elizabeth Chase | Frisco Public Library | Texas

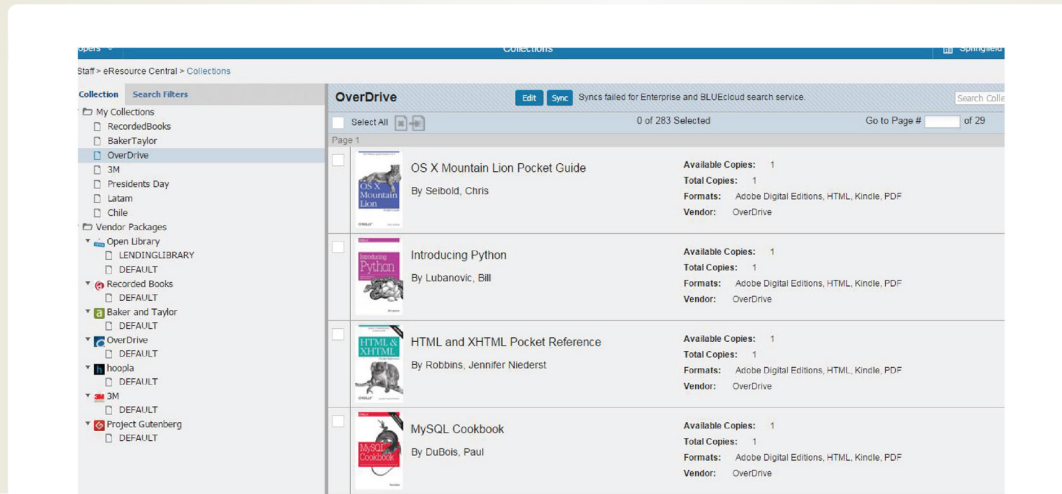

## Instant access

With a single click, patrons can download eBooks, mp3 files, audiobooks, and more directly from your catalog to their computer or mobile device.

## Thousands of titles in minutes

eRC syncs titles to your catalog quickly, without adding MARC records to your database, so your subscription eResources won't increase your maintenance costs.

## Features

- 19+ popular vendors in production, beta, or integrating
- Collection management for staff, including faceting
- Auto-syncing of purchased and delicensed titles (with supporting vendors)
- Live title copies/availability in both Admin title list and discovery hit list
- Physical and digital titles return in a single search for patrons
- View of current checkouts and holds in My Account
- Ability to return items early or cancel holds (with supporting vendors)
- eRC-specific faceting in your online catalog
